System Requirements For ExtractData:

This is not a "be all end all" FAQ but I am hoping to provide a bit of a base line of what this game requires so you can understand the game a bit better. Note that some of this information was provided by the developer and I have no clue how correct it is or if the assumptions I make are correct. As a disclaimer I am stating that these are my assumptions and if I got them wrong you are welcome to correct me. Quote: It will require a 3.0+GHz CPU, but it's not 100% required
